

Customer Support Performance Dashboard

This dashboard provides comprehensive insights into customer support operations, tracking ticket volumes, resolution efficiency, and customer satisfaction. Use the filters above to explore data by date range, category, priority, and country.

Key Performance Indicators

Monitor these three critical metrics to assess overall support performance. Compare against your targets and track changes over time using the filters above.

Total Support Tickets Received

40

Average Resolution Time (hours)

289

Customer Satisfaction Score

3.15

Ticket Volume Trends

Key Insight: This trend line reveals seasonal patterns and growth trajectories in support demand. Look for spikes that may indicate product issues or successful marketing campaigns driving new user adoption.

Monthly Ticket Volume Trend

Next Steps: Dive into the **Ticket Analysis** page to understand which categories drive volume and resolution time, or visit **User Engagement** to identify users who may need proactive outreach.
